Request for Approval

Howard University Homecoming

Football Stadium

LCD Outdoor Screen

Saturday, October 24, 2009

2225 Georgia Ave. N.W., Washington, DC 20059.
Phone: (202) 238-2640

Request: Riparian Broadcasting would like to add additional stadium excitement to the Homecoming Football Game experience by installing one LCD Outdoor Screen on one of two requested positions in or around the stadium. The screen will display the TV broadcast with commercials. The TV broadcasts is the same video that will be displayed on the LCD Outdoor Jumbotron in the Quadrangle.

There will be no sound on the screen at this location!

Requested Location for the Screen: There are two requested positions for the screen. Riparian Broadcasting would like both locations and both screens types approved (see photo on the next page). We would like to make our determination about which type and style of screen to use at a later date. Only one screen will be installed. Both styles are 9' x 10'.

Additional Request: Riparian Broadcast would like to request that the Bison Lounge segments that will be produced during the TV broadcast have sound piped via the stadium PA system. The lounge segments are 60 seconds in length and are shown during timeouts, etc.. The sound would be under the control of the PA announcer so that it could be cut when action resumes on the field. This is only a request, if it can not be honored it does not change the video that will be on the screen:
